

Universal gong VTA-GONG/REG

VTA-GONG/REG enables the adjustment of four ring types and its volume regulation.

It offers **convenient utilization by enabling communication between two or more lifts.**

For each lift it is possible to select a different tone type and the lift users have unique information of which lift has arrived to fulfil their request.

Due to its properties and parameters the electric gong can directly replace the mechanical gong. It's possible to install the electric gong without a change in installation.

ADVANTAGES

- 4 tone types.
- Continuously controllable volume – efficient for lift night service.
- Its construction and covering enable installation on a lift car.

BASIC TECHNICAL PARAMETERS

Voltage:	10V AC \pm 10 %
Power consumption:	2 W
Max. peak current after making cca 20 ms:	4 A
Number of tones:	4
Proportions HxWxL:	62x107x107 mm
Weight:	0,25 kg
Cover:	IP30
